Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9 and 11-20, drawn to spacer for a liquid crystal display (LCD), a method of producing a spacer for a LCD and a LCD using the above spacer.

Group II, claim 10, drawn to a method of measuring the contact angle of water on spacers for a liquid crystal display.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II is directed to *a method of measuring the contact angle of water* on spacers for a liquid crystal display, not to one of the processes being considered to have unity of invention, as specified in 37 CFR 1.475.
